In the early nineties, Dr. Jacobo Grinberg's career was blooming and he gained lots of international credit as a researcher in the fields of telepathy and neurophysiology at the Universidad Autónoma of México. When Dr. Grinberg mysteriously disappears in 1994, the police find no trace of him. The only thing that is clear, is that all his research material, including his computers, disappeared along with him.

Holding the scientific key to telepathy and mystical cures, Grinberg became a valuable asset in many contexts. For that reason, some claim that American governmental forces captured Jacobo and put him to work for them. Some say that his second wife was involved in his disappearance, alleging that she is not the person she claims to be.
